Unemployment and Wages

In June 2016, Daggett County's unemployment rate measured 5.4 percent, up only 0.1 percentage points since June 2015. Daggett County's jobless rate currently registers above the state and national figures.

First-time claims for unemployment insurance have been volatile due to the size of the base. Further, the leisure and hospitality businesses often employ nonresidents over the summer. When these workers discharged at the end of the tourist season, they claim unemployment in their home counties and therefore do not affect Daggett County statistics.

The change in the average monthly wage in the county trended to the slightly negative. The county's average monthly wage was $2,766
